

18 March 1965

MEMORANDUM FOR THE RECORD

25X1A9a 1. On this date Mr. Dan Rustin, Associate Editor, Publishers' Weekly, called about my letter of 16 March 1965. He stated that he had checked with [REDACTED] and found that the transcript of the Research and Engineering Council meeting on computerized typesetting would not be available until sometime in May. Since Mr. Rustin wants the information he requested in his letter of March 5, 1965, to extract for publication in the April 5th edition of Publishers' Weekly, the sources of information which I suggested in my letter would not be satisfactory to him. Mr. Rustin therefore asked if he could have a copy of the talk and any kind of a copy of the slides by March 24th.

2. I told Mr. Rustin that I would check to see if it was possible to send him a copy of the talk and of the slides. I then called Mr. Owen, Editor of PRINTING PRODUCTION Magazine, and informed him of Publishers' Weekly's request and told him that we did not want to give out any information on hyphenless justification to any magazine prior to his April edition being published.

3. Mr. Owen stated that since Publishers' Weekly's coverage was entirely different from PRINTING PRODUCTION's and since Publishers' Weekly only wanted to extract from the talk given at the conference, he had no objection to our giving them the information that they requested.

4. Therefore, since the Agency has already released this information for publication and is planning to release it to at least one other magazine (DATAMATION) I feel that Publishers' Weekly should have the information which they request. This will be sent to them in a form of Xerox copies of [REDACTED]'s talk and plain black and white prints of the slides used to illustrate the talk.
